THE CREOLES OF LOUISIANA.

There is perhaps no portion of our American citizens whose character is so little understood, especially at a distance, as that of the Creoles of Louisiana. Speaking a different language from the rest of their fellow-citizens—having long lived under different institutions, religious, civil and political,—how should we know these adopted members of the American family, but by a residence amongst them : and wherever you hear the Creoles of our country spoken of as they deserve, you will find it is in the warmest terms of esteem and respect.

In the late war, the Creoles gave the best earnest to the world of the gallantry and firmness with which they will be ever ready to repel invaders : and we find the venerable hero of our revolution, Lafayette, recently proclaiming the battle a phenomenon in military history identified with their brethren of the able and intrepid Jackson of Louisiana have secured character for devotion to their gallantry in support of its rights.

There are, however, many the character of the Louisiana known. Mr. Allen B. Magrath, a distinguished writer, a native of Opelousas in the last convention which formed our

The cordiality with which the Louisianians hailed their introduction into the United States government, has received a check from the misconduct of too many Americans. The moment the change was effected, a host of needy adventurers, allured by the softness of the climate, the hopes of gain, and inflated by extravagant expectations,

spread themselves along the Mississippi. Many men of candid minds, classical education, and useful professional endowments, have removed and settled in Louisiana ; but some without education or moral principle, prejudiced against the people as a nation whom they came to abuse and reside amongst. Too ignorant to acquire the language of the country, or to appreciate the qualities of the people, this class of men have engendered most of the hatred existing between the two nations that inhabit Louisiana. The evil of national animosity will gradually subside, as a more numerous and orderly race of people become the improvers of the public lands.

CREOLE

EVERYTHING that is "good" in New Orleans is "Creole." The highest praise that can be bestowed upon any article for sale along the streets and in the country is to declare that it is "Creole." Hence, in trade one hears continually the application, "Creole chicken," "Creole eggs," "Creole ponies," "Creole vegetables," etc. The term is used to distinguish the commercial product of New Orleans and of Louisiana as distinguished from that brought in from the North and West.

One hears, too, the term "Creole Negroes," but it must be remembered always that this is a fine distinction, meaning the blacks and colored people that are Louisiana-bred and born and French-speaking as distinguished from the Negroes of other States. "Creole" means "white," though, as already seen, it has been given many shades of signification—shades which have been taken up by ignorant scribblers and gradually accepted by many Northerners as meaning Louisianians of mixed blood. Nothing is more erroneous. The term "Creole," according to such standards as Webster and Worcester, signified "a native of Spanish America or the West Indies, descended from European ancestors." In Louisiana "Creole" has much the same meaning that "Knickerbocker" has in New York. There never was a nobler or more pure-blooded race than the Creoles of Louisiana, who are proud of their descent from the best families of France and Spain, and who apply to themselves the term "Creole" to distinguish the "old families" of the State from the families of emigrants of other nationalities.

“Under the law of Louisiana, **inherited from the Spanish and French regimes**, river frontage can not be sold or leased to private enterprise. This law prevents port facilities being sewed up by selfish interest...

But there is no law, however good, that meets all conditions, and a number of private enterprises - warehouses and factories - have undoubtedly been kept out of New Orleans because they could not secure water frontage.
